

Move your Al/ ML models into production faster with Teradata and AWS

To unlock the full promise and value of enterprise data, your AI/ML models must make it into production so they can deliver real outcomes across the business. So why are so many organizations failing to achieve this?

**74%** of companies haven't moved their data/AI initiatives into widespread production.<sup>1</sup>

# **Top reasons enterprise analytics projects fail include:**

20% of analytic insights will deliver business outcomes, according to Gartner.<sup>2</sup>

# **Unlock the possibilities in your industry**

Together, Teradata VantageCloud and Amazon SageMaker help move your advanced analytics projects into production faster and give stakeholders across the enterprise access to more insights—so they can deliver tangible results like these:

### Manufacturers

are enabling predictive maintenance by preempting the failure of vital machinery and components.

#### Healthcare providers

are creating seamless patient experiences by streamlining data across sources and systems.

**Financial services** institutions are deploying Al models to predict the likelihood of loan defaults and spot fraudulent activity in real time.

### What can AI help you achieve?

Ready to unlock the full power of your data by accelerating your AI/ML model deployment? Learn how Teradata and AWS can help.
